SUMMARY

Frontend Software Developer with 3+ years of experience developing scalable, production-ready web applications using React.js, Next.js, TypeScript, and JavaScript. Experienced in building complex product features, reusable UI architecture, secure API integrations, performance optimization, and delivering maintainable solutions through cross-functional Agile collaboration.

TECHNICAL SKILLS

Frontend - Typescript, JavaScript (ES6+), Reactjs, Nextjs, HTML5, CSS3, Tailwind CSS, Antd UI

State Management - Redux, redux-toolkit, Context API, Web APIs

API Integration - RESTful APIs, GraphQL, Axios, JWT Authentication

Version control - Git, GitLab, GCP Deployment, Branching & Merging, Code Review

UI/UX & Performance - Responsive Design, Cross-Browser Compatibility, Performance Optimization, Lazy Loading, SEO Optimization, Code Splitting, Web Vitals, Webpack/Vite

Testing & Debugging - Jest, RTL, Console Debugging

PROFESSIONAL EXPERIENCE

Cloverbay Technologies Pvt. Ltd. - Software Developer

Aug 2022 - Sep 2025

(Product & Enterprise Solutions)

- Contributed to the development and continuous enhancement of a scalable AdTech campaign management platform, building production-ready features using React.js, Next.js (SSR/SSG), TypeScript, and Redux Toolkit while collaborating closely with product, design, and backend teams.
- Designed and implemented role-based authentication and authorization supporting Advertiser, Publisher, and Seller personas, dynamically controlling feature access, navigation, and campaign visibility based on user roles and permissions.
- Built complex multi-step campaign creation workflows with dynamic form validation, conditional rendering, draft management, and API integration, enabling advertisers to efficiently create, update, and manage multiple campaign types.
- Owned frontend features for the Lyca eSIM self-service platform, delivering customer-facing features including user onboarding, eSIM activation, subscription management, dashboards, profile management, wishlist, order history, and secure payment workflows, while ensuring a seamless user experience.
- Developed and maintained Fynd's SaaS-based eCommerce storefronts, building scalable and reusable frontend solutions for brands including Mother Earth, GAP, Tiffany, Gas Jeans, and Ritu Kumar by integrating GraphQL APIs and configuring commerce experiences on the Fynd platform.
- Developed reusable UI components, custom hooks, and shared frontend utilities that increased component reuse by approximately 45%, improving maintainability and accelerating feature delivery across applications.

- Optimized frontend performance through lazy loading, dynamic imports, code splitting, image optimization, memoization, and list virtualization, contributing to 20–30% faster page rendering during Lighthouse and QA performance evaluations.
- Built secure authentication, session management, and payment workflows using JWT-based authentication and Stripe integration, ensuring reliable access control and seamless transaction processing.
- Refactored legacy frontend modules into reusable components and modern React patterns, reducing duplicate code by approximately 35% while improving scalability and long-term maintainability.
- Diagnosed and resolved production issues, browser compatibility problems, and UI regressions across multiple applications, helping reduce recurring frontend defects by approximately 30% through proactive debugging and code quality improvements.
- Developed unit and component tests using Jest and React Testing Library, validating component rendering, user interactions, form validations, accessibility, asynchronous API states, and critical business workflows to improve release confidence and minimize regression defects.
- Collaborated with Product Managers, UI/UX Designers, Backend Engineers, and QA teams throughout Agile sprint cycles, participating in feature estimation, code reviews, production deployments, and post-release support while delivering pixel-perfect and accessible user interfaces.

Cloverbay Technologies Pvt. Ltd. - Software Developer Intern

Mar 2022 - July 2022

(Product & Enterprise Solutions)

- Developed responsive and reusable UI components using React.js by translating Figma designs into production-ready interfaces following modern frontend best practices.
- Collaborated with senior engineers and UI/UX designers to implement accessible, pixel-perfect user interfaces while maintaining consistency across the application.
- Identified and fixed UI defects, cross-browser inconsistencies, and responsive layout issues, contributing to 20% faster QA sign-offs during feature validation cycles.
- Participated in Agile ceremonies, Git-based development workflows, Jira-based sprint execution, and peer code reviews while gaining hands-on experience in production software development.

EDUCATION

Dayananda Sagar Academy of Technology & Management - Bangalore, India

Bachelor of Engineering (B.E.) in Computer Science

Aug 2018 – Jul 2022

ADDITIONAL INFORMATION

- **Soft Skills:** Problem Solving, Critical Thinking, Effective Communication, Team Collaboration, Adaptability, Time Management, Attention to Detail
- **Languages:** English (Professional Working Proficiency), Hindi
- **Willing to Relocate:** Yes
